

Community Health Excellence Grants

Helping our provider partners deliver innovative care

Founded in 2009, the PacificSource Community Health Excellence (CHE) grants program has contributed more than \$11 million in funding to nearly 425 contracted providers across Oregon, Idaho, Montana, and Washington.

Each CHE application is independently evaluated based on patient impact. To be considered, proposed projects must benefit all patients and be payor-neutral.

Recently funded projects have addressed healthcare integration; provider workforce and pipeline development; culturally and linguistically appropriate outreach to patients; and more.

CHE grants seek to:

- Advance the quadruple aim through collaboration and innovative engagement between PacificSource and providers.
- Foster an environment of continuous improvement among providers who practice in communities PacificSource serves.
- Elicit the diverse capabilities of provider organizations in ways that make a significant, positive health impact for unique patient populations.

How to apply for a CHE grant

Visit PacificSource.com/CHE-program to:

- Review and download the Application Guide
- Enter the grants portal
- Submit application and budget form by 5:00 p.m. Pacific time, August 22, 2024
